Read and complete the chart.

Wonders of the World

The world is full of wonderful and amazing places. Some of these places are made by nature, and some of them are made by people. Here are some of the greatest wonders of our world.

Mount Everest is the highest mountain in the world. It is 8,848 meters high, and it is located in Nepal. It's over 60 million years old.

The Nile is the longest river in the world. It is 6,853 kilometers long, and it is located in Africa. It flows through five countries: Uganda, Ethiopia, Sudan, Burundi, and Egypt.

The Great Barrier Reef is the largest coral reef system in the world. It is also the largest living structure. It is made up of around 2,900 coral reefs. The Great Barrier Reef is located in Australia.

The Great Wall of China is the longest man-made structure in the world. It is 21,196 kilometers long. It took thousands of years to build the wall.

What?	Mount Everest	The Nile	The Great Barrier Reef	The Great Wall of China
Detail 1	the 1 highest mountain in the world	the 4 longest river in the world	the 7 largest coral reef system in the world	the 10 longest man-made structure in the world
Detail 2	2 8,848 meters high	5 6,853 kilometers long	8 2,900 coral reefs	11 21,196 kilometers long
Where is it located?	3 Nepal	6 Africa	9 Australia	12 China

School Link 2 CLIL Activity Music Name _____

Read and answer the questions.

String Instruments

Violins, cellos, and guitars have something in common. They all have strings, so they are called string instruments.

The sounds from string instruments are made by the vibration of the strings. One way to vibrate the strings is to use your fingers to pluck them. Guitars are played this way. Another way to vibrate the strings is to use a bow. Musicians rub the bow across the strings to make sounds. Violins are played this way.

The first simple string instruments were made in ancient times. Ancient Egyptians played the harp over 5,000 years ago. Their strings were made from animal hair or guts, but today, most strings are made from nylon or steel.

There are many different string instruments from around the world. They all look different, and they all make beautiful sounds.

- Violins, cellos, and guitars have something in common. What is it?
They all have strings.
- How are sounds from string instruments made?
They are made by the vibration of the strings.
- What are the two different ways to vibrate the strings on the instruments?
One way is **to use your fingers to pluck the strings.**
Another way is **to use a bow.**
- When were the first simple string instruments made?
They were made in ancient times.
- When did ancient Egyptians play the harp?
They played the harp over 5,000 years ago.
- What were ancient Egyptian strings made from?
They were made from animal hair or guts.

School Link 3 CLIL Activity Science Name _____

Read and match.

- | | |
|-------------------|--|
| 1 muscle | a n. the act of moving from one place or position to another |
| 2 contract | b n. a fully grown person |
| 3 movement | c n. body tissue that can contract and relax to produce movement |
| 4 adult | d v. to make (something) smaller or shorter |
| 5 bone | e v. to become or to cause (something) to become less tense, tight, or stiff |
| 6 relax | f n. any one of the hard pieces that form a skeleton inside a person's or animal's body |

Read and write the correct words using the words from A.

Muscles and Bones

Imagine you are running in a race. Your legs are moving quickly. What's happening inside your legs? Your muscles and bones are working together. They are making your legs run.

Muscle s use power and energy to move your body. Some muscles are attached to your bones, and they are called skeletal muscles. They work together with your **bone** s to help you move.

Our body needs a lot of bones and skeletal muscles to move around. In an **adult** body, there are 206 bones and over 650 skeletal muscles.

How do muscles help you move?

Muscles work by **contract** ing. That means they get shorter and thicker as they work together. There are two kinds of muscles that control almost all body **movement** s. They are called flexor and extensor muscles. When one muscle contracts, the other muscle **relax** es.

CLIL Activity
History

Name _____

● Read and answer with your partner.

(Questions 1–4)

The wheel was invented around 5,500 years ago by the ancient Sumerians. They lived on the land between the Tigris and the Euphrates Rivers in the Middle East. It was called Sumer. This land is now a modern country called Iraq.

- 1 What would be the best title for the passage above?
The Sumerians' Wheel (Answers may vary.)
- 2 What did the ancient Sumerians invent?
They invented the wheel.
- 3 When was the wheel invented?
It was invented around 5,500 years ago.
- 4 What was Iraq called during ancient times?
It was called Sumer during ancient times.

(Questions 5–8)

The Sumerians were very inventive people. They invented many things to make their lives better. Besides the wheel, they also invented the sailboat, schools, and canals. The canals helped them bring water to their land for farming. And, there is one more great invention! The Sumerians invented the very first writing system in the world. It is known as cuneiform.

- 5 What would be the best title for the passage above?
The Inventive Sumerians (Answers may vary.)
- 6 What else did the Sumerians invent besides the wheel?
They invented the sailboat, schools, and canals.
- 7 How did the canals help the Sumerians?
The canals helped the Sumerians bring water to their land for farming.
- 8 What was the Sumerians' first writing system called?
It was called cuneiform.
